

CS INSTASHINE LIQUID

Marble Polisher

PRODUCT DESCRIPTION

CS INSTASHINE LIQUID is a ready-to-use polishing and restoration cream for calcareous stones. CS INSTASHINE LIQUID provides the stone with a factory-finish polish with minimum equipment. It can remove minor scratches and stains and also provide a high degree of polish.

COVERAGE ESTIMATES

Approximately 1000 – 1200 sq. ft. per bottle. Coverage depends on application

APPLICATION INSTRUCTIONS

Surface Preparation

- Surface should free of dirt, debris, oil and other loose particles
- Rinse surface thoroughly with water and air dry prior to application
- Wax, epoxy or anything coatings should be removed before application
- Extremely worn out/damaged surface should be resurfaced before polishing

Application

- Patch test highly recommended
- Protect adjacent areas that are not to be treated with the polisher
- Shake bottle before use.
- Once the surface is clean, dampen the surface with water and apply CS Instashine L. (about 30 mL per 15 sq. ft.)
- Add water to turn cream into flowing slurry and polish the surface with low speed machine with polishing pad
- Most surfaces require 4 – 5 passes in all directions. However, as composition of stones vary, a patch test will determine the procedure on case-to-case basis.
- Once repolishing is achieved, vacuum the slurry and immediately flood rinse the area with clean water and vacuum the water and towel dry.
- Clean the entire area with clean water or mild soap solution once job is complete. Vacuum/towel dry properly.
- Avoid contact of re-polished area with the slurry again to prevent stains.

APPLICATION AREAS

- Marble
- Polished limestone
- Travertine
- Terrazzo
- Other Calcareous stones

STORAGE AND SHELF-LIFE

CS INSTASHINE LIQUID has a shelf life of approximately 1 year from the date of manufacture when stored under cool and dry conditions in original container.

TECHNICAL INFORMATION

Appearance	White, opaque, cream-like liquid
Odour	Mild, characteristic
Density	1.4 - 0.1 g/cm ³
pH	0.5 – 1.0

CAUTION

- Black marble requires extra care as they are sensitive post polishing
- Green marble and some white marbles may or may not be polished properly with this product. Consult our technical staff and conduct a small area patch test to determine the efficacy of the product.
- Proper protective equipment should be used at all times during application as the product is mildly acidic.
- Extremely worn out surfaces to be resurfaced before application
